

THE POWER OF **CONNECTED**

YELLOWHEAD HELICOPTERS PRAISES PERFORMANCE AND RELIABILITY OF EAGLE 407HP

Honeywell HTS900 engine shows its strength during hot-and-high missions

SEAN RICKARDS
DIRECTOR OF OPERATIONS
YELLOWHEAD HELICOPTERS

“ Now that our customers have actually seen how the aircraft performs, it’s changed their way of thinking about what aircraft will best suit them. In a lot of cases now, it’s the 407HP. It fits perfectly into our fleet. ”

*Sean Rickards, director of operations,
Yellowhead Helicopters*

Overview

Yellowhead Helicopters has flown its two Honeywell HTS900-powered Eagle 407HPs for more than 1,000 hours in total. The engine’s performance is delivering benefits to a range of hot-and-high altitude missions, with the HTS900 found to be both reliable and easy to maintain.

Quick Facts

Customer

- Name: Yellowhead Helicopters
- Location: Prince George, Canada
- Industry: Helicopter services
- Website: www.yhl.ca

Customer results

- Increased hot and high performance
- Ability to carry additional loads
- Easier maintenance

Why the customer chose Honeywell

- Need for additional power and payload
- Enhanced safety of the dual channel FADEC
- Fuel savings and resultant reduction in CO2 emissions
