

TPE331 CHANNEL PARTNER LOCATIONS

Managing Our Network to Meet Customer Demand

LINE MAINTENANCE

Perform flight line and transient services such as minor inspection, oil and filter changes, removal and replacement of engines, external line replaceable units, accessories and components, plus all related services not requiring disassembly of either the engine turbo-machinery or its components.

MAJOR MAINTENANCE

Perform engine disassembly, repairs, reassembly and test. Engine disassembly is limited to major periodic inspections, turbine hot section inspections, gearbox inspection, component troubleshooting, removal and replacement. This includes unscheduled maintenance such as FOD, bird strike, etc. Major maintenance includes the performance of Line or Flight Line (if applicable).

HEAVY/OVERHAUL MAINTENANCE

Perform disassembly, inspection, repair, reassembly and functional test of an engine, an engine module, LRU or component thereof originally furnished by or through Honeywell. Heavy authorization is restricted to core repair events only. This definition includes any additional maintenance required to bring the engine to serviceable standards.
